

## Munich

To be successful, you need strong partners. Bauwens develops, plans, builds and operates real estate projects in both residential and commercial construction: residential districts, office buildings, hotels and shopping centers. Based on a thorough market analysis, we cover the entire value-creation process, from the on-budget construction to the efficient operation of the new building. This is how we create innovative products and lasting value for investors and owner-occupiers. We are always on the lookout for land and buildings with development potential that meet the criteria in the box to the right.

### Documents and Contact Information

Do you have an interesting property you would like to sell? For an initial estimate, please send us a site plan, any information about the property owner and the zoning. With existing buildings, we also need to know about the lease term and the building's structure.
